WHY BUY GOLD?

PROTECT

YOUR WEALTH

Since the crisis in 2008, people have paid more attention to their finances and are looking harder than ever for alternative methods of protecting the value of their money. Gold offers a long-term safe haven for those looking to protect and preserve the value of their wealth as it will always hold a significant value no matter what. Gold investment should be viewed primarily as a low-risk security asset for yourself and your family's future.

The unpredictable nature of UK economy and the Eurozone, especially since Brexit began, suggests further long-term strength and likely rises in the global gold price, but these potential profits should not be the main reason for investing in gold. Bullion should be viewed as a non speculative, safe, long-term method of safeguarding your wealth. Owning gold offers a unique and interesting element to your portfolio, offering an opportunity to spread the risk from the uncertainty of other investments such as stocks and shares, property, and currencies, which may be under-performing.

WHY BUY GOLD?

CONTROL PART

OF YOUR WEALTH

The physical ownership of gold bullion bars and coins gives investors the ultimate control over their wealth. Instead of trusting third parties and handling your money over to a fund manager, or even leaving it in the bank, holding your gold at home or in secure storage gives you true control, ownership and responsibility over your own future instead of relying on others to do so.

This Control can only be achieved through owning physical gold bars and coins, not paper gold or electronic gold (ETFs). This control even extends to choosing how, where and when to release the value of part or all of the value of your investment. Hundreds of bullion dealers are willing to buy your gold instantly over the telephone. Investors can realize the value of the gold in just a few minutes and get a bank transfer or instant cash payment onsite the very same day.

THE ULTIMATE INSURANCE

Owning gold could well be the ultimate insurance for turbulent times. It's an age old question which people have been asking for centuries – where is my money really safe? More and more people are now choosing the oldest answer: GOLD.

The UK and wider economies might not be in quite the same turmoil as 5-10 years ago, but the economic situation is not greatly improved. Living costs are higher while wage growth has been very slow to catch up with inflation. Banks are wary of lending and interest rates are very low.

This is where gold comes in. Gold offers about much certainty as you can get and bullion, unlike other investments, will always hold a value. Gold bullion is an effective way of hedging against other investments as its value tends to be particularly buoyant when other investments such as stocks and property are under-performing.

Gold can also be used effectively to insure you against other economic factors such as inflation and deflation. Interest rates, stock market jitters and currency problems. Importantly, as a highly precious metal, gold's worth is recognized internationally, and is considered. A valuable luxury no matter where you are in the world. An additional convenient, positive aspect is that gold bars and gold coins can be taken with you easily, wherever you go.

It is often said that there is never a bad time to own gold. It's a physical asset, a timeless asset, an asset that cannot be devalued in the way money can be by the government simply deciding to print more through Quantitative Easing. Even in the most extreme and unlikely scenario that the banking system should face collapse and paper money lose all its value, gold bullion, particularly small units of gold such as gold coins, could be used to buy and trade yourself out of trouble.

TRADING MECHANISM

JK GOLD, which has a strong presence in Dubai, is well connected with Merchants who wish to purchase pure gold (99.9% purity) in physical form (i.e. gold bars) and maintains a business relationship and is contractually secured, with full payment made on delivery at contractually fixed prices.

Buying orders are executed back-to-back with one or multiple counter parties and the gold stock is fully insured. These may include local suppliers and refineries with full payment made at the local refinery at contractually fixed prices. where allowed by circumstances, buying interests is aggregated and bulk back-to-back buying orders are executed for the purposes of securing better prices and maximizing profit.

In a case where there is no exact matching, the unsecured part of each trade (i.e. the mismatch) is hedged via CME gold futures or the spot market and the position in such futures is reduced proportionally to future selling transactions executed against gold traders/ buyers.

GOLD IS VERY PRECIOUS

IN CONCLUSION

With both consumers and central Banks in many of the worlds most powerful economies buying

Unparalleled amounts of the precious metal, has there ever been a better time to buy gold?

Don't make the mistake of thinking I'm not rich enough to buy gold. In some countries like Germany.

India and Russia, some of which experienced economic collapse within living memory, buying and owning gold is a very common way of protecting and preserving your wealth.

Its advised everybody should own between 5% and 10% of their liquid wealth in gold bars and / or coins, whether you're a person with some savings or a multi-millionaire. In either case acts as the ultimate guard against turbulent economic times.

THOMAS KOSHY (Chairman & Founder)
